

SAM SALAMEH

Email: sam.dev1@hotmail.com | **Phone:** +961 70 841 1009 | **Location:** Beirut, Lebanon
LinkedIn: [linkedin.com/in/sam-salameh](https://www.linkedin.com/in/sam-salameh) | **Professional Focus:** Network Engineering & Infrastructure

PROFESSIONAL SUMMARY

Accomplished Network Engineer with 15+ years of progressive experience designing, implementing, configuring, and troubleshooting enterprise-grade networking infrastructure. Expertise in managing complex multi-protocol environments across diverse industries including telecommunications, financial services, healthcare, and oil/gas. Proven track record implementing cutting-edge technologies (MikroTik, Ubiquiti, Fortinet, Cisco) and delivering high-availability solutions. Strong technical foundation combined with exceptional problem-solving capabilities and a commitment to maintaining secure, resilient network infrastructure. Skilled in network optimization, performance monitoring, and delivering measurable business value through infrastructure excellence.

CORE COMPETENCIES

Network Infrastructure	Wireless Technologies	Security & Monitoring
Network Architecture Design	Wireless Network Installation	Firewall Configuration
Network Configuration Management	WLAN Troubleshooting	Network Security Protocols
Traffic Analysis & Optimization	RF Planning & Site Surveys	Intrusion Detection Systems
Cisco, MikroTik, Fortinet, Ubiquiti	Fiber Optic Networks	Proactive Monitoring
Performance Enhancement	Network Redundancy	VPN & Encryption
WAN & LAN Management	Mesh Networks	Compliance & Auditing

PROFESSIONAL EXPERIENCE

Senior Network Engineer

Freelance | Beirut, Lebanon

Dec 2023 - Present

- Design and deploy enterprise network solutions including LAN, WAN, and wireless infrastructure for medium to large-scale organizations
- Manage network configurations across multiple device platforms (Cisco, MikroTik, Ubiquiti), ensuring seamless integration and operational standards
- Conduct comprehensive real-time traffic analysis to identify inefficiencies and implement optimization strategies that enhance performance and reduce congestion
- Strengthen network security through deployment of advanced security measures, continuous threat monitoring, and swift incident response
- Provide technical consultation to clients on network modernization, scalability, and infrastructure resilience
- Achieve average client satisfaction score of 95% through responsive support and solution delivery

Network Management Consultant

Freelance | Beirut, Lebanon

Oct 2021 - Nov 2023

- Managed network infrastructure for 10+ clients simultaneously, ensuring uptime and performance targets consistently met
- Performed deep-level network audits and capacity planning for organizations transitioning to high-bandwidth operations
- Implemented network monitoring solutions (SNMP, Netflow) providing real-time visibility into infrastructure health
- Resolved critical network issues efficiently, minimizing downtime and maintaining business continuity for client operations
- Collaborated with IT teams to design and implement network security protocols and access control policies
- Documented network architecture and created technical runbooks for knowledge transfer and operational sustainability

Satellite Technician

Keserwan | Beirut, Lebanon

Dec 2009 - Sep 2021

- Installed, maintained, and repaired satellite TV equipment and home electrical systems, ensuring optimal performance and customer safety
- Diagnosed and resolved technical issues in satellite systems and UPS units, delivering efficient solutions with minimal customer disruption
- Installed and configured solar power systems and UPS units, optimizing energy efficiency and providing dependable backup power for residential and commercial properties

- Managed inventory of specialized equipment and scheduled preventive maintenance to reduce system failures
- Trained junior technicians on installation procedures and troubleshooting methodologies, building team technical capability

Networking Technician

Professional Network, Keserwan | Beirut, Lebanon

Jan 2010 - Jun 2023

- Designed and implemented network infrastructure across diverse environments (offices, retail locations, industrial facilities) for high-performance connectivity
- Managed complex LAN, WLAN, and Fiber Optic networks ensuring optimal performance and seamless user experience
- Delivered high-quality networking solutions at Prico and Wise locations, leveraging hands-on experience across multiple platforms (Cable One, Terranet, Cumian, Professional Network)
- Consistently met stringent industry standards for network implementations, achieving 99.8% uptime across managed infrastructure
- Collaborated with cross-functional teams to troubleshoot complex issues and implement permanent, scalable solutions

TECHNICAL SKILLS & CERTIFICATIONS

Networking Platforms & Tools:

- Cisco IOS/IOS-XE, MikroTik RouterOS, Ubiquiti UniFi, Fortinet FortiGate
- Network Monitoring: SNMP, Netflow, Syslog, Nagios
- Wireless Technologies: 802.11ac/ax (WiFi 5/6), RF Planning, Site Surveys
- Network Protocols: TCP/IP, BGP, OSPF, EIGRP, RIP, VLANs, QoS
- Security: IPsec VPN, Firewalls, Access Control Lists, Network Segmentation
- Fiber Optic Technologies: Installation, Splicing, Testing, Troubleshooting

Technical Expertise:

- Network Design & Architecture | Network Optimization | Performance Monitoring
- Wireless Infrastructure | Fiber Optic Networks | Network Security | Disaster Recovery
- Linux System Administration | Windows Server Management | Basic Python Scripting

EDUCATION

B3 - Information Technology

Dekwane Technical School | Beirut, Lebanon

Sep 2013 - Jun 2016

Completed comprehensive IT technical certification program with coursework in networking fundamentals, system administration, and infrastructure technologies.

LANGUAGES

- **Arabic:** Native Proficiency
 - **English:** Fluent (Professional Working Proficiency)
 - **French:** Basic Conversational (if applicable)
-

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- MikroTik Certified Associate (anticipated)
 - Ubiquiti Certified Associate (anticipated)
 - CompTIA Network+ (recommended for career advancement)
 - Cisco CCNA Routing & Switching (recommended for career advancement)
-

ADDITIONAL INFORMATION

Technical Achievements:

- Successfully migrated 5+ organizations to modern network infrastructure, reducing operational costs by 20-30%
- Resolved critical network performance issues for enterprise clients, improving throughput by 40-50%
- Designed redundant network architectures achieving 99.8%+ uptime across multiple sites
- Implemented comprehensive network monitoring reducing incident response time by 60%

Professional Attributes:

- Strong analytical and problem-solving capabilities
- Excellent communication skills with both technical and non-technical stakeholders
- Team player with proven ability to work independently and meet deadlines
- Commitment to continuous learning and staying current with emerging network technologies
- Available for immediate full-time or contract positions

Available upon request | Portfolio of implemented solutions available for qualified employers

CAREER OBJECTIVES

Seeking a challenging Network Engineer or Network Administrator position with an innovative organization where technical expertise, infrastructure knowledge, and problem-solving abilities can drive digital transformation and business growth. Committed to leveraging 15+ years of networking experience to design scalable, secure, and high-performance solutions that support organizational objectives.
